

Important Features of Netball Shoes

1. CUSHIONING

When stopping suddenly to shoot or pass during play, the force applied to your feet and legs can exceed your body weight by up to 6 times. That's a lot of stress – so cushioning is one of the most critical features of a netball shoe.

2. TRACTION

Netball can be played on a variety of different surfaces. A good outsole will allow you to pivot easier, provide grip and will ensure the shoe lasts longer.

3. STABILITY

With so many stopping, starting and jarring actions, stability is critical in a good netball shoe. Look for a shoe which allows your foot to sit down inside the shoe and has a firm heel counter.

4. SHOCK ABSORPTION

With so much pressure on your feet, adding an innersole can help to provide you with extra support and cushioning.

Fitprint®

Fitprint® is revolutionary computer technology that scans your feet through different phases of your gait.

Fitprint® identifies pressure points in your feet and assists the highly trained staff at The Athlete's Foot to recommend the most comfortable, best-fitting shoes you will ever wear.

Fitprint® is a complimentary service and is exclusive to The Athlete's Foot.
